

## Phonics Course Success Story

"I wanted to take this opportunity to thank you for helping me to complete the 'Australian Teaching Modern Phonics Course'. I couldn't have done it without your support and help!!

I signed up to complete this course after seeing first hand how successful this programme is in teaching children to read and write. I still can't believe how much of a difference doing this course has made to my life. I can now tutor my son at home and know that he's not being left behind at school, and I have peace of mind knowing that my two younger daughters will benefit from the knowledge and skills I can now pass on to them.

While doing the course I also became enthusiastic about wanting to help other children, as well as adults, who are having problems with reading and writing. This course has taught me how to assess problems that a child or adult is experiencing and also how to address these problems. It is an easy to understand, straight forward course that has been put together so well. I have been telling everyone and anyone who will listen, how great this course is, and even if they don't want to go on to tutor other children, they should do it to help their own children!

Thank you again for your patience and knowledge - this is what got me through this life changing course!"
